More About This Resource

Why use spiral review?

This spiral review provides students with a daily dose of practice on grade level standards. ALL students are more likely to master and retain concepts when using spiral review as part of their daily schedule. In addition, teachers will always know where their students are still struggling.

How to use this resource as HOMEWORK

- Give each student a homework sheet on Monday.
- They will complete one column each night (Monday through Thursday).
- At the beginning or end of class each day, take about 5-8 minutes to quickly review the previous night's homework and clarify any questions.
- Students use the "My Progress" section to keep track of how they are doing, and it helps hold them accountable for their own learning.
- On Friday, use the included weekly quizzes to track student progress and see where students need further instruction.

How to use this resource in CLASS (morning work, warm ups, etc.)

- Each day, students complete just one column (Monday through Thursday).
- When time allows, take about 5-8 minutes to review that day's work. This gives students time to monitor their own progress and to ask questions.
- On Friday, give the included weekly quiz. This is the perfect time to assess your students and see where they still need help.

What Teachers are Saying...

First of all, it is a great spiral review so that the kids won't "forget" everything they learned earlier in the year. Secondly, it saves paper. With budgets being what they are and copy allocations going down, this is huge! Also, with the ability to edit this, differentiation can be a big part of homework. Thank you so much for creating and sharing. -Shannon

I have been using this product all year long. I think my students and parents appreciate the consistency with homework. This packet has made my life so much easier - I just edit a few things (completely editable - another great thing), print off, and give it to my students on Monday. Thank you thank you thank you! -Caroline

Seriously fool-proof!
Concepts are clearly labeled in titles, so I can click print and I'm done.
Thanks for making it editable so I can change things if they don't quite fit. Fantastic value for a year's worth of homework!
- Mrs. Little

If only A+++++ were an option for review...
This resource is incredible. I LOVE that it is editable so I can differentiate instruction for all of my varying learners. I can also edit story problems to follow the concept, but insert my student's names and ideas from other themes we are currently studying. This helps to further engage my students. Last but not least, the self-assessment component is so helpful. I can quickly see who needs more work with certain concepts so I can pull those kids for small group work during independent practice time. The thoughtfulness and TIME you put into this resource is so appreciated. WORTH EVERY CENT! - Tegan
